SUMMARY

I am a dedicated and ambitious Software Engineer, driven by a relentless desire to acquire the essential experience that will pave the way for a successful career. I am committed to becoming a highly competent professional. With a strong sense of responsibility, a friendly demeanor, and a proven track record as a collaborative team player, I am willing to gain more hands-on experience and contribute to the world of technologies. My ultimate aspiration is to continually evolve and strive for excellence, actively seeking every opportunity professional and personal growth of course.

PROJECTS

Front-End	<p>Where In The World</p> <p>App built with HTML, CSS, TypeScript and Angular using rest countries API, in the app I am showing population of the countries, in what region they are located and also their capital cities.</p>
Front-End	<p>Todo-App</p> <p>TaskMaster is a powerful to-do application built with HTML, CSS, TypeScript and Angular, designed to streamline task management and boost productivity. TaskMaster helps users efficiently organize and prioritize their tasks, ensuring they stay on top of their workload.</p>
Front-End	<p>Redberry task</p> <p>This is the application, where users can post articles and see it too, I built this with the help of Angular, users can engage in CRUD operations. I utilized dependency injection, routing, and forms.</p>
Front-End	<p>Recipe Sharing Application</p> <p>Application where users can post, view, edit, and delete recipes, I used mock database in this application. This project aims to assess the understanding of Angular fundamentals, including components, services, routing, and forms.</p>
Front-End	<p>Fylo Dark</p> <p>Fusely, the ultimate landing page solution that combines sleek design. Fusely also is fully responsive web site. built with Angular.</p>
Back-end	<p>Authentication Authorizationb App</p> <p>This .NET 6 Web API application facilitates user sign-up, email verification and confirmation, and pass wordforgot andreset functionalities. It provides secure endpoints to manage user authentication-related processes.</p>
Back-end	<p>Employee Full Stack App (Backend)</p> <p>This project is a .NET 6 Web API application developed using Entity Framework Core for data access and Microsoft SQL Server as the database. Application made to store employees information.</p>
Back-end	<p>Bank Account Management App</p> <p>This user-friendly application enables seamless product management built with JavaFX. The application integrates with a MySQL database through JDBC for data storage.</p>

EDUCATION

09/2021-06/2025	Business and Technology University - Tbilisi, Georgia	BCs in Informational Technologies
	Took courses while studying like: Programming on Java - Front-End development - Databases (Oracle SQL, SQLite) - Programming Python (OOP, Web) - Data structures and Algorithms 	
01/2024-04/2024	Professional Training Center Daniel Castelao - Vigo, Spain	BCs in Informational Technologies
	Took courses while studying like: Front-End development (Angular) - Data access (Java Database Connectivity) - Databases (MongoDB, PostgreSQL, objectDB) 	

LANGUAGES

Georgian	Native
